

# Power Security: Generating Resiliency

Electricity is essential for commerce.  
Learn how to ensure that your business stays  
open when the power goes out.

Join PowerPro Service Company for a  
**LUNCH & LEARN** on  
**Power Security: Generating  
Resiliency for your Business**

**LUNCH  
& LEARN**

**May 23rd  
12pm  
to 1pm**

You can't do business if your doors are closed. The U.S. power grid is facing more threats now than ever. Severe weather, aging equipment and now cyberattacks are real threats to the electrical stability we all need. With a **Standby Generator** you won't be "powerless" against blackouts, brownouts and regional outages.

PowerPro Service Company will conduct a one hour **Lunch & Learn** on the ways electrical resiliency can be built into your present business. Join us on Wednesday, May 23rd, for a look at how **Standby Generators** can keep your lights on and your doors open.

Seats are limited and the food will be delicious. Give us a call at our office or contact Jen Friske at L.I.B.I. directly, to RSVP and reserve your spot.
